

Key Investor Information

This document provides you with key investor information about this subfund. It is not marketing material. The information is required by law to help you to understand the nature and the risks of investing in this subfund. You are advised to read it so you can make an informed decision about whether to invest.

UBS ETF (CH) – Gold (EUR) hedged (EUR) A-dis, a subfund of the UBS ETF (CH) (ISIN: CH0106027144) umbrella fund

This subfund is managed by UBS Fund Management (Switzerland) AG, a wholly owned subsidiary of UBS Group AG.

Objectives and Investment Policy

The investment objective of the subfund is to reflect the performance of gold once the commission and charges paid by it have been deducted. For the hedged subfunds, the currency risk that exists between the fund currency and the US dollar is hedged.

The subfund invests exclusively in physical gold. This normally takes the form of standard bars weighing approximately 12.5 kg, with a purity of at least 995/1,000. The fund management company uses derivatives solely to hedge against currency risks.

Investors can buy fund units directly from the issuer (primary) or by trading on a stock exchange (secondary market). The issue and redemption of fund units by the fund management company or its distributors are referred to as the primary market. The purchase or sale of fund units via the stock exchange is referred to as the secondary market.

Distributing, although given the nature of the investment strategy actual distributions are not expected.

Risk and reward profile

Additional information about this category

- The assigned risk category is based on an estimate of the subfund's future performance. The method used for this estimate depends on both the fund type and historical data.
- Historical performance of the subfund is not a reliable indicator for future performance.
- Risk category allocation is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this subfund is free of risk.

Why is the subfund in this category?

The subfund is in risk category 5 because the volatility of its returns is high. The subfund invests in commodities and may therefore be subject to high fluctuations in value. Based on past experience, although the correlation between commodities and traditional asset classes is only slight or even negative, no guarantee can be given that the value of a unit will not fall below the purchase price. This requires corresponding risk tolerance and capacity. The value of a unit may be influenced by currency fluctuations.

Further material risks:

- The subfund may use derivatives which can reduce investor risks or give rise to additional risks (including the risk of loss due to the bankruptcy of the counterparty).
- Each subfund is exposed to specific risks. A detailed and comprehensive description of these risks can be found in the prospectus.
- Sustainability criteria are not taken into account when selecting the index. Sustainability risks are therefore excluded due to the investment objective of the subfund.

Charges

Fees and other charges paid are used to finance the ongoing management and custody of the fund's assets, as well as the marketing and distribution of fund units. Any costs incurred will reduce the investor's potential returns.

One-off charges taken before and after you invest¹

Entry charge	5.00% ²
Exit charge	3.00% ²
Conversion fee	3.00%

Charges taken from the subfund over a year

Ongoing charges	0.23%
-----------------	-------

Charges taken from the class under certain specific conditions

Performance fee	none
-----------------	------

¹ This is the maximum that might be taken out of your money before you invest and before your return is paid out.

² Investors buying and selling on the secondary market pay the fees set by their stockbroker. These fees are published by the stock exchanges on which the traded shares are listed and can also be obtained from the stockbroker.

The **issuing commissions** and **redemption commissions** stated here represent maximum amounts. In some cases you might pay less – consult your financial advisor for the current applicable amounts.

The **ongoing charges** shown here are based on expenses for the financial year ending in June 2020. This figure may vary from year to year. Not included are:

- Transaction costs, except the cost of buying or selling units in other target funds.

For more information, please see the charges section of the Fund's prospectus, which is available at www.ubs.com/etf.

Past performance

Past results are no guarantee of future performance.

The chart shows the investment returns of the subfund, expressed as a percentage change in the subfund's net asset value from the end of one year to the end of the next. In general, the calculation of past performance takes account of all ongoing charges but not the entry charge. If the subfund is managed against a benchmark, its return is also shown.

The class was launched in 2010.

Past performance was calculated in EUR.
